

Transforming Transport 14-11-07

Longer Distance Domestic Travel Workshop

What are the key drivers and points of leverage for emissions in your topic area?

Locations:

- Business
- Gov't
- Family and Relatives
- Fav. Holiday destinations

Time Critical vs. flexibility Connectivity

Why Travel:

- “escape”
- Business
- Visiting friends, family
- Tourist

Rationalizing day tripping

Need to Travel:

- Technology alternatives to travel
- IT to travel efficiently
- CO₂

Critical Mass – more pax in a mode

What could a climate supportive transport system in your topic area look like in 2025?

2025

- Coastal Shipping/ PAX Shipping inc/nightly
- High speed rail (overnight) – main trunk line
- Tourist – “Loop” trails, Enhance destination experience to reduce travel
- Tele conferencing
- Meet 90% RE electricity target
- Significant budget increase required

Low Carbon Transport

- Roads? Air travel? (C\$, Externalities, Viable?)
- Choices ~ Smart given C constrained world

What needs to happen now to help the transformation of your topic area towards a more climate supportive system?

- Pleasure/Comfort
- Complete electrification of main trunk line & harmonise reengineering
 - Reradius, gaps to close
- Political Will – Shift away from roading
- Sustainable C reducing transport decisions
- Internalise cost of C – 2009
- Need “City” inside working well
- Public Mandate – Public engaged & educated
